TROPICAL CYCLONE BULLETIN NR. 1
Typhoon OBET (SAUDEL)
Issued at 5:00 PM, 22 August 2026
Valid for broadcast until the next bulletin at 11:00 PM today.

TRACK AND INTENSITY OUTLOOK
• **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.** • OBET will continue moving generally west northwestward for the next 2 days before moving generally westward for the remaining forecast period. Based on the forecast track, OBET will remain far from the Philippine landmass and will exit the PAR within 12 hours. • OBET may slightly intensify but will remain a typhoon inside PAR. Afterwards, OBET will steadily weaken while moving over the southern islands of Japan up to the sea north of Taiwan. After OBET makes landfall over the southeastern portion of mainland China, It will weaken into a Severe Tropical Storm by Friday (28 August) and further weaken into a Tropical Storm by Saturday (29 August).

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 PM today.
